Imagine that you are preparing a project with your friend. You have found some interesting material for the presentation and you want to read this text to your friend. You have 2 minutes to read the text silently, then be ready to read it out aloud. You will not have more than 2 minutes to read it.

Everybody dreams while they are sleeping. This experience often includes pictures, voices or sounds, thoughts, and other kinds of sensations. We all know that dreams are not under our control. It makes dreams so interesting. Scientists have found out a lot about this mysterious process. We now know that the majority of people see dreams in full colour but some people have only black-and-white dreams. We forget most of our dreams. Within 5 minutes of us waking up from a dream, half the dream is already forgotten. Dreams are very symbolic but we experience real feelings and emotions while dreaming. Negative emotions appear much more often in our dreams than positive ones. It means that there are so many things about the human brain that we still do not know about.

You will have to start speaking in 2 minutes and will speak for not more than 2 minutes (12–15 sentences). In your talk remember to speak about:

- where and when the photo was taken
- what/who is in the photo
- what is happening
- why you keep the photo in your album
- why you decided to show the picture to your friend

You have to talk continuously, starting with:

“I’ve chosen photo number... ”
